

UHR-KRAFT®

COLLECTION

UHR-KRAFT®

Time to be different.

Watches are more than simple timepieces. For those who wear them, they are much more an expression of their individuality and personality. This is why it is especially important that the piece of jewellery on one's own wrist stands out from the crowd and underscores its owner's sense of style.

UHR-KRAFT stands for high-quality watches with their own character – precision and quality at an attractive price. individual design, superior craftsmanship and limited editions predestine each watch as a coveted item for aficionados and collectors alike.*

In the new collection 2012 you will find timepieces committed to the highest standards of quality. All current models run with premium clockworks from the manufacturers RONDA and ISASwiss. The quality assurance and the service are carried out in our German production facilities in Essen by our experienced watchmakers.

QUALITY FEATURES OF AN UHR-KRAFT

Movement

Specific, premium, persistent – in the new UHR-KRAFT-collection 2012 you find quality tested clockworks from the swiss manufacturers RONDA and ISASwiss

Bracelet

Our leather and rubber straps are all made of top-quality materials. Some models are equipped with a butterfly clasp that connects the two parts of the strap with hinges. This makes it much easier to put the watch on or to take it off, because the strap is not opened completely.

Case

The watchcases are all made of high-quality stainless steel. Please choose your favorite color: steel, rosé gold (18ct edition), black iP (ion plating) or two-tone rosé gold / black iP

Watch glass

For our watches we only use sapphire crystal - one of the hardest types of watch glasses, and mineralcrystal – which surface is harder than steel.
